SUPRA DISPLAYPORT

DisplayPort is one of the most common standards for computer graphics, but is now also frequent used for projectors and TVs. Our patented 24K gold-plated DP connector are an important factor in maintaining the image quality we are known for. The connector is inter-changeable, which enables cable installation in conduit pipes. The Displayport cable is terminated with Supra UHD8, which with its lightning-fast, shielded and precise transmission of the binary code is hard to beat.

The patented detachable connector housing allows a straight or a angled shell, as well as being able to install the cable with connector part through a conduit pipe for concealed installation when the connector housing is removed. The plug itself is carefully soldered by qualified personnel, as well as cast in a strong plastic to withstand handling without the contact housing being assembled. It is possible to run the cable in a 25 mm conduit pipe or alternatively a 30mm conduit hose. The housing is made of metal and after assembly it provides 100% shielding properties.
