

SUPRA DIGITAL EXCALIBUR XLR

Silver Plated Digital AES/EBU 110 Ohm

Gauge: 1x3x0.24mm² / AWG 23

Rev.date: 2024-01-16

Customs tariff no: 8544499390

Country of origin: Sweden

- PE foam insulation, extremely low capacitance
- AES/EBU true 110 ohm - signal pulse without flattening or slowing down
- Double shielded with efficient foil and silver plated braid
- 100% Silver plated OFC wires - Rhodium plated XLR plugs

Digital Excalibur XLR - Pure Silver Plated OFC, Pure Performance

Unleash the true potential of your audio system with our latest innovation, the Supra Digital Excalibur Series. Meticulously crafted for audiophiles and music enthusiasts, these high-quality digital audio cables redefine the standards of precision and performance. The Digital Excalibur AES/EBU version boasts an exact 110 ohm impedance, featuring Rhodium plated XLR-plugs for seamless connectivity. Our commitment to excellence is reflected in the construction of this cable. It is meticulously crafted with 100% silver plated wires, ensuring a pristine signal transfer for an unrivaled listening experience. The use of PE-foam insulation not only minimizes capacitance but also facilitates high-speed velocity transfer, preserving the integrity of your audio signal. Each cable is a masterpiece, hand-soldered by experienced personnel to guarantee precision and reliability. The connectors are coated with Rhodium for enhanced conductivity & durability. The result is a product that not only meets but exceeds the expectations of true audio connoisseurs.

Precision engineering meets Swedish craftsmanship. The Supra Digital Excalibur Series is proudly made in Sweden, a testament to our commitment to quality and attention to detail. Immerse yourself in the exceptional sound that only a product of this caliber can deliver. Elevate your audio journey with the Supra Digital Excalibur Series – where innovation meets sonic perfection. Immerse yourself in the nuances of your favorite music and experience sound like never before. Upgrade to excellence. Application example: AES/EBU; Professional digital audio signals, and high-end hifi equipment, e.g. between CD-drive and DAC.

CONSTRUCTION

Cable:	SUPRA Digital Excalibur 110 Ohm
Jacket:	PVC GA74 Crystal, round
Screen:	Double screened, foil and Silver plated OFC braid
Colour/Size:	Transparent Iceblue, 6.1mm
Screen connection:	Balanced connection, the screen is connected in both ends.
Connectors:	SUPRA Swift XLR Rhodium
- Type:	1 XLR Female > 1 XLR Male
- Material:	Rhodium plated Copper alloy
- Colour:	Silver/Rhodium
- Locking:	Snap lock at device & screw clamp at the cable
Char. impedance:	110 Ohm AES/EBU
Solder tin:	Almit SR34 Super
Signal direction:	Male to Female
Packing:	Carton 20x20x4cm
Special length are made upon order, add only additional cost per extra meter.
