4BNC-4BNC Cable

Audio/Video Multi Core Co-ax 75 Ohm

AV-4 comprises 4 individual 75 Ohm rated coax cores, surrounded by a common overall foil screen, which further minimises RF break-through. Each core has a braided screen of tin plated OFC. The Supra AV series is of very low capacitance owing to the PE foam insulation. The construction is especially developed for audio & video use, and suits several applications with DB25, Scart, RCA, S-VHS and BNC connectors. The timing error is less than 2.2 ns which enables accurate RGB transmission.

Applications: Game consoles, Home Theatre, Video walls, High resolution video projection,CG workstations or Studio tie lines. RGB/S-video/Composite Video/Component Video.
