

SUPRA FS SCART (1M) £38 ●●●●●

The FS (Full Scart) is all about quality: its Swedish designers fitted chunky metal plugs with gold-plated connectors to ensure good contact, and the rather fetching baby-blue cable features individually shielded oxygen-free copper strands for pure signal carriage. All this means that, despite its low price, the FS is a very competent performer. Colours are natural and vibrant and detail levels are astonishing, given the price. The sound is somewhat anaemic, but if you have a separate audio hook-up, that's no problem.
