VERDICT

It adds clarity, but some might not like the resulting leaner sound

WE GAVE THE sturdy Supra LoRad MDO6-BS/SP mains filter Otis Redding's emotive and rich-sounding *A Change Is Gonna Come* to handle, and the Supra's effect on the sound became noticeable.

Vocal clarity increased and became more transparent, but the sound also became leaner, losing some of the depth and the characteristic punchiness of a good soul recording. Despite the advantages, it doesn't offer enough improvement to justify a higher rating.

The sturdy build of this mains block is always appealing
