### Sublink 1XLR/F-1RCA Audio White

Analogue Interconnect cable, Hi-Hi, Line & Subwoofer - mono

Supra SubLink is suitable as a single channel interconnect such as Active speakers, AV-receiver LFE out to sub-woofer LFE input, or as a pair of stereo interconnects. Low capacitance and efficient shielding provides for long cable routing such as e.g. sub-woofers. The cable is possible to connect as single-end or balanced with any of our suitable connectors as follows; RCA-6 or Swift XLR. An excellent entry level cable for the conscious hi-fi listener how will not satisfy with the sub-standard interconnects usually enclosed with entry level hifi equipment. We believe it will be the starting point of exploring the positive impact of Supra's interconnects, which will allow any hi-fi device to reach its full potential.
