Y-link 1RCA-2RCA Audio

Splits singel channel sub-woofer output to two mono inputs

Supra Y-Link allows for interconnection between a receiver with a single LFE channel output and an active sub-woofer without specific LFE input but instead two channel (stereo) inputs, or any other devices that is desired to feed with one single channel. Sometimes the output sound level from the sub-woofer becomes too low when feeding only one of the inputs, why we have developed Y-Link cable that branches from one to two single-ended RCA connectors, making it possible to feed both channels with the same mono signal. The Y-Link does not provide stereo sound, it splits only the mono LFE (single) channel to double mono inputs. Terminated with SUPRA RCA-8SL and RCA-6.
